About Me

Computer Science and Engineering student specializing in Cybersecurity (Honours) with a minor in Robotics & Automation. Skilled in **cybersecurity, full-stack development, networking, UI/UX design, web development, and software testing.** Experienced speaker, community leader, collaborator, and event organizer.

Education

B.Tech in Computer Science and Engineering(Cybersecurity), SJCET, Palai Sept 2023 – May 2027
• GPA: 8.45 (up to S4)
Higher Secondary School Education, St. Mary's Convent School, Alakode June 2021 – March 2023
• GPA: 7.20

Experience

Kerala Police Cyberdome – Grapnel Team - Developer

- Engineered the responsive CSAM Takedown and Trace Dashboard using client-side PhotoDNA perceptual hashing for secure, efficient case monitoring.
- Engineered the Europol-inspired "Trace an Object" crowdsourcing platform to gather analyst leads and enable victim reporting for rapid CSAM takedowns.

WebMaster, IEEE SB SJCET

April 2025 – Present

- Managed IEEE SB SJCET and external websites by designing secure, accessible pages to enhance member engagement and team coordination.

Cybersecurity Analyst, RoomNumber404

July 2025 – Present

- Secured community websites and platform integrity through team coordination and secure coding, while conducting cybersecurity workshops.

MERN Stack Developer, BRIK Community

June 2025 – Present

- Developing scalable MERN stack applications for BRIK's community-driven projects, collaborating in a student-led environment focused on product building and peer mentorship.

Assistant Network Technician, ITTA Cable Network – Pulingome, Kannur

Feb 2021 – Aug 2024

- Configured and optimized OLTs, routers, and fiber networks, streamlining operations with automated tools, SQL scripting, and advanced troubleshooting techniques.
- Designed and implemented scalable networking solutions, ensuring seamless client connectivity, minimal downtime, and robust security measures.
- Documented network designs, provided technical training, and collaborated across teams to enhance operational efficiency and knowledge sharing.

Mentor, Internship – The Nexus Project (SJCET Bootcamp)

June 2025 – July 2025

- Mentored student interns in developing a web platform, guiding UI/UX and full-stack implementation with technical feedback and support.

Volunteering Experience

College Lead, HackTheBox Kerala SJCET

March 2025 – June 2025

- Partnered with HackTheBox Kerala to lead campus cybersecurity initiatives, organizing CTFs and hands-on workshops to enhance ethical hacking skills.

IPR & Research Lead, Startup Bootcamp SJCET-IEDC

January 2025 – Present

- Directed student IP work patent drafts, prior art, documentation—and co-organized research workshops and IP programs with Startup Bootcamp SJCET-IEDC.

Vice-Chairperson, IEEE SIGHT SB SJCET

April 2025 – Present

- Assisted in planning and executing IEEE SIGHT community outreach projects while coordinating with teams and partners to strengthen collaboration and communication.

Lead, TheNexusProject (Foss Club)

June 2025 – October 2025

- Contributed to organizing FOSS workshops and events, supporting the club's initiatives.

Graphic Designer, IEEE SB SJCET

May 2024 – March 2025

- Designed and delivered creative visuals for events, enhancing engagement and participation; ensured IEEE branding compliance and timely delivery using Figma, Photoshop, and Illustrator.

Certifications

Blockchain Foundation Program from Kerala Blockchain Academy

Software design & Development from Infosys Springboard

Programming in C certification from Infosys Springboard

Achievements

Hac'KP 2025 — Kerala Police CyberDome International Hackathon

- Won the hackathon and received the Outstanding Performance Award with a cash prize.
- Developed two innovative products for INTERPOL and other global policing agencies to aid in combating CSAM and supporting digital investigations.

Smart India Hackathon Prelims

- Developed a file carving utility with a PySide6 GUI in a four-member team, enabling recovery of deleted files across filesystems and earning 2nd place with a [INR]10,000 cash prize.

Top 250 CTF Finalist

- Ranked top 250 internationally in a CTF competition by collaboratively solving time-critical challenges in cryptography, steganography, and web exploitation.

Skills

Programming : Python, C, Java ,Shellscript, SQL, TailWindCSS, Javascript, Next.js, TypeScript, React, Vite

Softwares & Tools : Cybersecurity Tools, VS Code, MySQL, Git & Github, Figma, Photoshop, Godot, Unreal Engine, Router Configuration

General Skills : Multitasking, communication, leadership, teamwork, adaptability, technical and critical skills, decision-making, mentoring.

Projects

AI Pentester

github.com

- Built a Docker-based AI-assisted platform to automate parallel network and web penetration testing with centralized reporting.

Monkey Pen AI

github.com

- Built an AI tool to convert digital text into realistic handwritten output with multiple styles, live preview, and export support.

Orvane

Proprietary software

- Developed a browser extension for end-to-end encrypted messaging using custom AES encryption and ECDH key exchange.

Audio Adversarial Attack Generator

github.com

- Developed a Python/PyTorch framework for generating targeted adversarial audio against Wav2Vec2 ASR using CTC-based optimization.

Asthra CTF

github.com

- A custom CTF platform built from scratch for my college's tech fest, actively used for the past two years.
